

STEM DESIGN PROCESS LOGBOOK

Egg like tooth
Experiment

ASK

What is the Problem?

Can tooth past protect
our teeth.

IMAGINE

How can the problem be solved?

The one
with tooth past
is going to
be protected as
if that is how
I can protect
one of the eggs.

Why is this the best solution?

Cause it is.

PLAN

List down all the materials you need

Draw your blueprint

2 egg

Vinager

Bowl

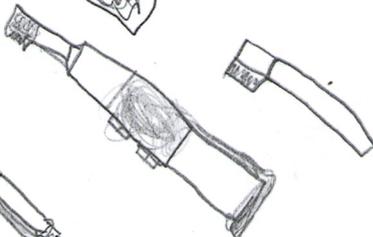

big plate

Tooth phast

Tooth brush

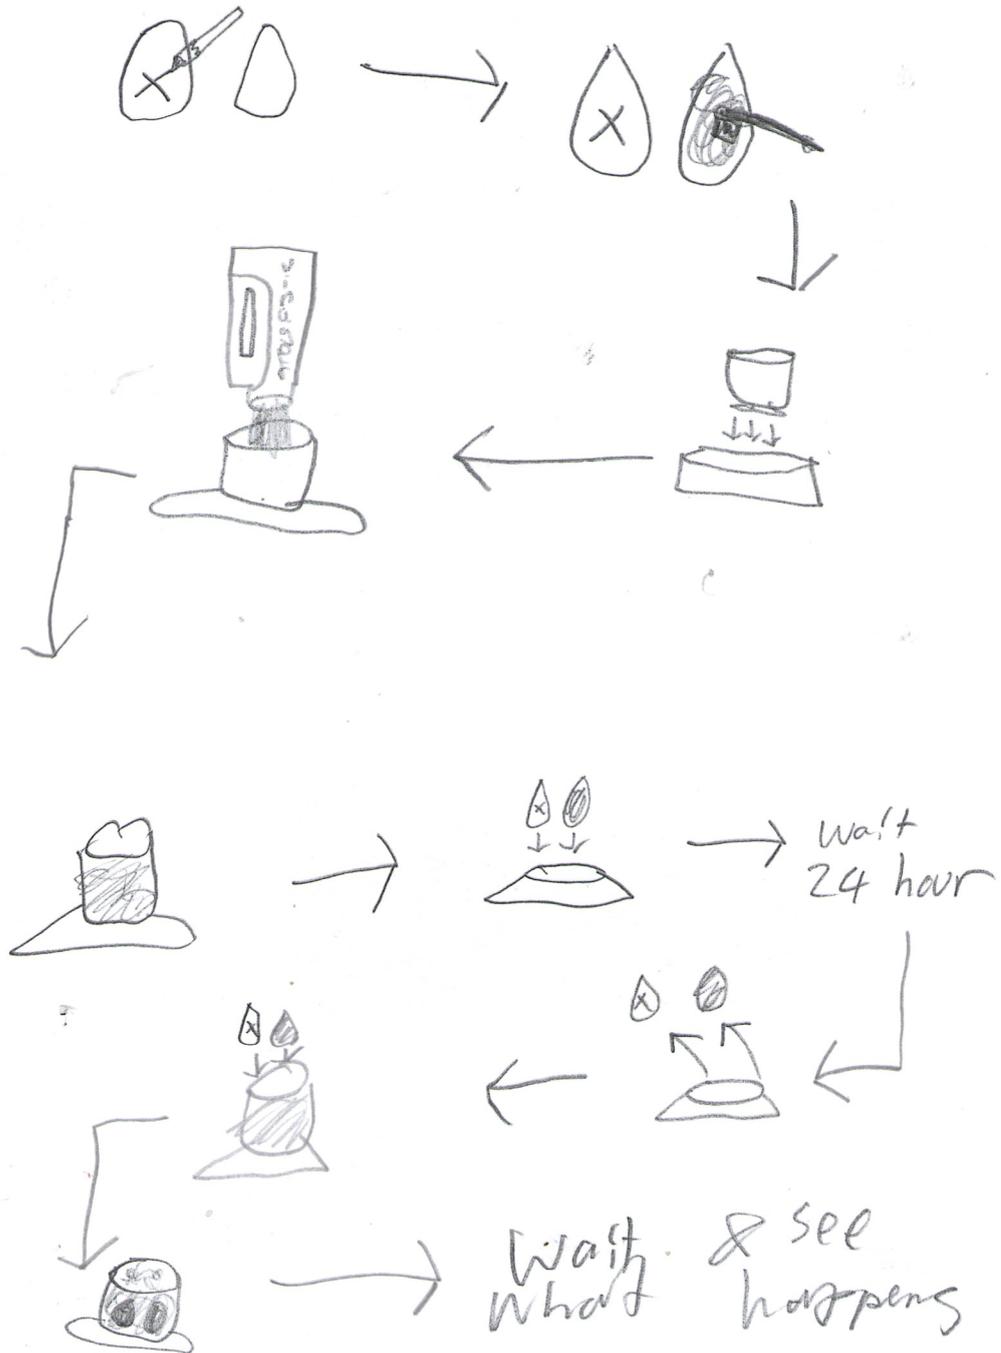

pen

CREATE

Step By Step Description of the model

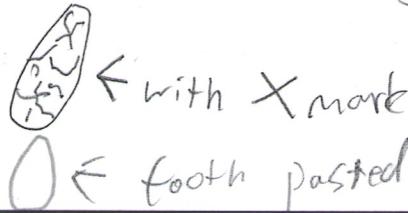

IMPROVE

What happened when you tested your plan?

The egg with
X on it was damaged!!!

What worked in your plan?

Everything worked

What can you improve on?

next time, I can
try more eggs

Topic: _____

Date: _____

All with this experiment
worked perfect, my materials were:
Eggs x 2, bowl, vinegar, toothpaste.
all these materials were used & everything
went on well.

I also tried to break the eggs
& they kinda feel squishy to
break!
