

STEM DESIGN PROCESS LOGBOOK

Final project

ASK

What is the Problem?

how can I make some
kind of circuit I want

IMAGINE

How can the problem be solved?

I can try to research.

Why is this the best solution?

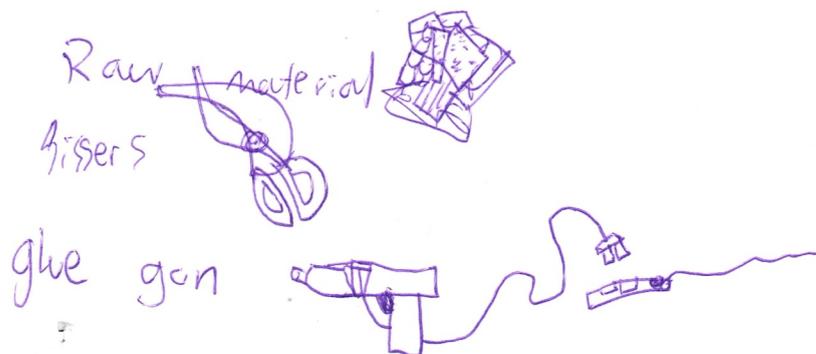

So I can get the best information.

PLAN

List down all the materials you need

Draw your blueprint

CREATE

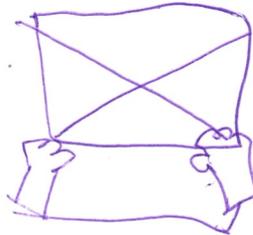

Step By Step Description of the model

1) Draw a blueprint

2) Design, get material

3) Create

4) add detail

IMPROVE

What happened when you tested your plan?

I burned my hand

What worked in your plan?

I finished my build.

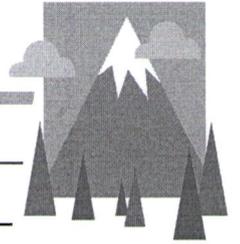

What can you improve on?

even by making it look
more detailed &
realistic.

Topic: _____

Date: _____

This is my creation.

It is a battle arena & is one I created with simple materials.

my materials are:

Cardboard

sugar cube

plastic

bricks

glue

gluegun

glue stick

wood sticks (round)

popicul stick (wooden) (colorful too)

& finally a base.
